Performance Driven

LOMA® Wheels

One of the reasons LOMA builds the most lightweight rims in the wheels industry is, constant competition in several Motorsport series worldwide.

LOMA® BLAZING STAR

The BLAZING STAR Luxury Forged Concave Wheels are made for the Gentleman that wants an extra portion of luxury and performance for his car. A very special look. Naturally, we offer this beautiful forged wheels for the complete Audi A6 palette including all S- and RS-Models.

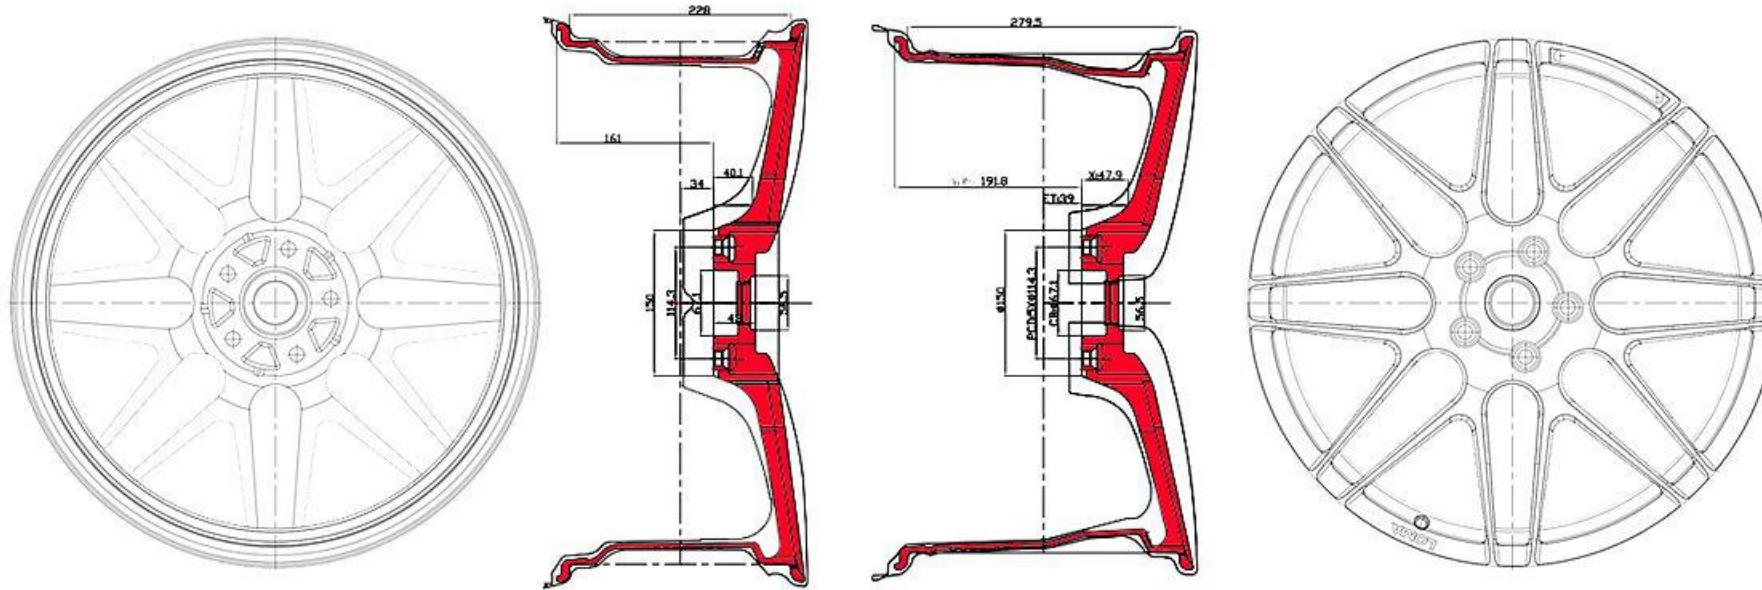

These Forged Rims are available in 19", 20", 21", 22" and 23"-Inches. At LOMA® you can choose between a color palette of 42 thousand shades and colors in Matt, gloss or a beautiful Diamond finish. We apply only the best. All our wheels are produced from T6061 European Forged Aluminum (tempered AlMg1Bi1Si).

Features:

- Extended spoke design that makes the Blazing Star look 1-Inch bigger than it is.
- Undercut behind the spoke, that gives a deep 3D feeling from every angle.
- Superlight design with a weight of 9.8 kg (20-Inch).
- 24H center cap logo that displays LOMA's motorsport heritage.

STANDARD MONOBLOCK CONCAVE PROFILES

LOMA® FORGED WHEELS ARE CNC MACHINED USING LOMA'S EUROPEAN'S HIGH TECH T6065 (TEMPERED ALMG1BI1SI) ALUMINUM WITH OUR **PATENTED FORGING PROCESSES** TO GAIN THE STRONGEST STRUCTURE. TO PROVIDE ANY VEHICLE WITH THE MOST EFFICIENT SPOKE PROFILE AND DESIGN, OUR FORGINGS ARE **SPECIALLY CALCULATED** AND **ENGINEERED** WITHOUT THE USAGE OF SURPLUS MATERIAL ON THE FRONT OR REAR SIDE OF THE FORGED WHEELS. THIS TO ACCOMMODATE ANY DESIGN FROM **STRAIGHT** UNTIL **SUPER DEEP CONCAVE** PROFILES. THIS IN-HOUSE DEVELOPMENT AND ENGINEERING IN DESIGN ALLOW US TO PRODUCE WIDTHS FROM 8.5" INCHES WITH **MAXIMUM CONCAVITY** EQUAL TO THAT OF A 13.0" INCHES.

About us

A mission that challenges us to step further than possible to expand human potential, here we embrace interesting opportunities and new ideas.

By these, we create groundbreaking innovations in Superlight designs with proven mathematics and aerodynamics in rim design, CFRP carbon fiber car body improvements to create downforce with aerodynamics effects in challenging design.

These since 2008 with style in design for the Automotive OEM and Aftermarket Industries.

By making our products as sustainable as possible we focus on recycling most of our production leftover material. Hereby we challenge our creative and diverse global team by making a pro-active positive impact within the communities where we live and work and share our sportive sense of humor where we learned what's a real challenge in the racing industries. Those years made us grow in knowledge, often we listened to words as "difficult, impossible and solved" these became the standard, now we apply "solved" daily while taking a challenge.

LOMA® Group Monaco, Sarl is based in Monte Carlo, Monaco, including several successful brands within the automotive industry where knowledge, teamwork, open talent management and innovation is our success for tomorrow.
